

# OWN THE NETWORK

There are 3 things you need to do to take complete responsibility for your client networks:

Know about network issues before your clients do.

Provide strategic guidance to evolve the network to meet your clients' business needs.

Minimize network risk to the business.

With Auvik, you can do all three—efficiently and cost-effectively.

*"With Auvik, we can truly say we have full network visibility and control. We can say it, and we can deliver it."*

**Corey Kirkendoll**  
President & CEO, SK Technical Services

# Auvik adds the network to your existing solution stack

Auvik goes deep on network infrastructure like routers, switches, and firewalls to complement the endpoint visibility of traditional RMM tools. With Auvik, you gain visibility and control of a client's *complete* IT environment.

Automated real-time network mapping & inventory

Pre-configured network monitoring tuned to industry best practices

Network management, including automated configuration backups

Integrates with

- ConnectWise Manage™
- ConnectWise Automate™
- Autotask®
- continuum®

*“Auvik perfectly complements the other software and technology that we have in our product stack for looking after our clients. The visibility that we now have for network devices, which we didn't have before, gives us a much more complete solution.”*

**Martin Hynes**  
Commercial Director  
Business Computer Solutions
